Of this amount only \$58,016,019 was in actual circulation on the first day of the present month, the remainder being held in the Treasury as part of the

assets of the Government or being represented by outstanding certificates.

"The records of the Treasury Depart-ment show that during the eleven months bearing May 21, 1822, and ending May 1.

ment show that during the ceven months beginning May 21, 1892, and ending May 1, 1891, the coin Treasury notes issued for the purchase of silver bullion under the act of July 14, 1890, amounted to \$49.561,184, and that during the same period the amount of such notes paid in gold was \$47,745,173. It thus appears that all the diver builton purchased during that time, except \$2.216,811 worth, was paid for in told, while the builton itself is stored in kind of obligation.

"How long the Government shall thus be compelled to purchase silver bullion and increase the public debt by issuing coin obligations in payment for it, is a question which Consress alone can answer. It is evident that if this policy is continued and the Secretary of the Treasury shall be compelled to Issue bonds or otherwise increase the interest-bearing public debt, it will be done for the purpose of procuring gold with which to pay for silver bullion purchased under the act referred to."

LAND PARK YESTERDAY.
